

Amanda Mewborn

Director, Transformation Engineering

Industrial systems engineer and actively practicing nurse equals wisdom and experience

Over the past ten years, Amanda has gained diverse experience in healthcare operations, working at hospitals and focusing on areas such as finance, decision support, benchmarking, cost accounting, process improvement, revenue enhancement, managed care contracting, nursing, clinical operations improvement, and patient satisfaction. An industrial and systems engineer as well as a registered nurse, Amanda has served as an internal consultant during her employment at hospitals.

While employed full-time at StatCom, Amanda continues to practice as an ICU nurse at a pediatric hospital to maintain current knowledge of hospital operations and to continue to refine her clinical skills. During her tenure at hospitals in the metro-Atlanta area, she improved processes using tools such as six sigma, DMAIC, LEAN, and PDSA. Her favorite project while working in hospitals was leading several teams in the development of all processes associated with the opening of a new hospital in metro-Atlanta, including mapping all processes on swim-lane diagrams, and development of standard operating procedures.

Amanda has a Master of Science in Health Systems from Georgia Institute of Technology and a Bachelor of Science in Industrial and Systems Engineering from Georgia Institute of Technology. Most recently, she earned a Bachelor of Science in Nursing from Georgia State University, which she earned while working full-time in a director-level role at a metro-Atlanta hospital.

Amanda has been an active member of HFMA, IIE, and SHS. She served on the board of the Georgia HIMSS chapter from 2000 to 2008, including serving as president in 2007. She has presented on industry topics at several healthcare conferences. She is currently serving as a track coordinator for patient flow and throughput presentations for the Society for Health Systems Conference in February 2010.

About StatCom – Through process re-engineering and enabling software, StatCom's Hospital Operating System™ helps hospitals transform their operations to deliver efficient patient throughput, reduced ALOS, and improved physician, patient and staff satisfaction. StatCom is a subsidiary of Jackson Healthcare® (www.jacksonhealthcare.com), a group of companies focused on providing the healthcare industry with innovative people resources and IT solutions. For more information, visit www.statcom.com, or contact StatCom at 800.930.0870 or info@statcom.com.

“My passion is improving efficiency in healthcare operations so that care providers are able to deliver the highest levels of patient care, and patients are the recipients of satisfying healing, and high quality healthcare services.”
