

# David Merrill

## Solutions Engineer

***Designing intuitive products ensures that healthcare providers will use it successfully***

After joining StatCom in 2003 David quickly became a key player on both the implementation and development teams. He led the company's product implementation group, overseeing process definitions, user and functional requirements, and technical specifications. He also designed the system architecture and user interface that helps to make StatCom such an intuitive product for healthcare providers.

David began his career as an IT expert for healthcare organizations such as the American Social Health Association and Duke University.

While at Duke he developed a Preoperative Services intranet site. Other duties at Duke included network and server administration and gathering user requirements for a web-based scheduling system.

He has been integral to growth of StatCom and the development of the application's capabilities, as well as the company's ability to successfully implement it.

David received a Bachelor of Science in Electrical Engineering, a Bachelor of Science in Computer Engineering, and a Master of Science in Environmental Systems Engineering from Clemson University.
