

Jan B. Grimsley

Executive Advisor

Experienced health systems engineering professional focused on operational and performance improvement

Jan has over 25 years of experience providing hospital-based management engineering and consulting services for individual hospitals, health systems, and as part of a national consulting group. She brings expertise focused on operational, financial, and clinical improvement. Jan uses her collaborative leadership style to complement her skills in project management as she works with hospital executives and staff to transform their operations.

As part of VHA Inc.'s national consulting group, Jan managed a work force collaborative program and coordinated the external consultant team for over 40 member healthcare organizations, 17 regional offices, and internal and subcontracted consultants. She has also developed and coordinated the VHA Georgia regional office radiology collaborative for 17 state-wide hospital teams, which resulted in an

impact in two years of over \$10 million with generation of more than 125 improvement ideas.

Jan has delivered system-wide hospital-based internal consulting for PROMINA Health System in Atlanta, which consisted of five integrated healthcare systems, with documented impact exceeding \$13.6 million. System projects included clinical and financial benchmarking, new system implementation, balanced scorecard implementation, revenue cycle management, JCAHO core measures support, and quality pay for performance initiatives. Other expertise includes operational improvement for emergency departments, transformation in care delivery programs, performance improvement redesign, hospital patient throughput, implementation of balanced scorecards, and supply chain management.

Jan has a Bachelor of Science in Health Systems from Georgia Institute of Technology. She is a member of Healthcare Information and Management Systems Society and Institute of Industrial Engineers/Society for Health Systems. She has presented at national, regional, and state conferences on process improvement topics, as well as participated as a subject matter expert for national conference presentation reviews.

About StatCom – Through process re-engineering and enabling software, StatCom's Hospital Operating System™ helps hospitals transform their operations to deliver efficient patient throughput, reduced ALOS, and improved physician, patient and staff satisfaction. StatCom is a subsidiary of Jackson Healthcare® (www.jacksonhealthcare.com), a group of companies focused on providing the healthcare industry with innovative people resources and IT solutions. For more information, visit www.statcom.com, or contact StatCom at 800.930.0870 or info@statcom.com.
